

**MIELE AUSTRALIA AND NEW ZEALAND PTY. LTD.**  
**ENVIRONMENTAL POLICY STATEMENT**

Miele ANZ imports, markets and distributes to commercial and domestic customers products supplied by its parent company Miele & Cie. KG in Germany.

At Miele ANZ, we are committed to the protection of the environment and fulfilment of all applicable environmental compliance obligations.

During product development, Miele Germany's sustainable innovation strategy aims to reduce waste and minimise the consumption of raw materials and to ensure that appliances can be used for as long as possible. The result is not only reduced environmental impact but also satisfied customers. Furthermore, not only are Miele's packaging materials recyclable, but due to their high metal content, Miele's appliances are amongst the most recyclable in the world. All plastic components are marked so that they can be manually sorted by their different materials at the end of a machine's life.

As an importer and distributor, Miele ANZ seeks to prevent pollution and environmental damage by setting specific environmental objectives and targets. To reduce energy, minimise waste and optimise recycling opportunities Miele ANZ introduced a programme of continual improvement in compliance with the requirements of the ISO 14001 Environmental Management Systems.
